Canyon**

Nolan Construction has started work on a new Holiday Inn Express Hotel & Suites project for owners group Napa Junction Hotel Venture LLC. The hotel site is part of the residential/retail complex on the Highway 29 corridor at Napa Junction Road containing over 200 apartments, 7 restaurants, various shops, a bank and anchored by Wal-Mart.

Veteran Superintendent Paul Nolan will oversee the project for Nolan Construction. Paul has been working in construction in Solano and Napa Counties since 1975, and is joined by Project Manager Kevin Butler, Assistant Project Manager Jennifer Wilson, and Project Executive Dave Dosker on the building team. The hotel was designed by architect TKF & Associates in Sacramento. Stan Boyd, one of the hotel partners, says, "It has been a pleasure working with the professional team at Nolan Construction to build the Holiday Inn Express Napa Valley. They have delivered the results on time and on budget and truly been great to work with. I would highly recommend them."

The Holiday Inn Express Napa Valley is a three story structure on 2.4 acres. It will feature 100 guest rooms, pool and spa, a breakfast area in the Great Room, and 2,000 square feet of conference space in four configurable meeting rooms. The facility will also include a large outdoor pool deck, which can be used for group luncheons, receptions, or other activities. The hotel provides guests easy access to Napa Valley wineries, restaurants, and is conveniently located close to the numerous corporate parks and the Napa Airport.
